SKILLS

- **Languages:** C++, JavaScript, C, PHP
- **Frameworks:** HTML and CSS, Tailwind CSS, NodeJS, React
- **Tools/Platforms:** MySQL, MongoDB, GitHub
- **Soft Skills:** Problem Solving, Passionate, Team Player, Adaptability, Work Ethic

PROJECT

PG-Wale bhaiya - Full-Stack Web Project | [Github](#)

Jun' 2025 – Oct' 2025

- Engineered the frontend architecture of a fully responsive, mobile-first PG accommodation platform using HTML5, CSS3, Tailwind CSS, JavaScript, and jQuery; improved page rendering performance and reduced layout shift across devices.
- Developed dynamic client-side features such as real-time search/filter components, booking inquiry form with asynchronous validation, and a multi-step host verification flow using modular JavaScript—resulting in higher UI responsiveness and reduced user friction
- Optimized frontend performance by implementing Tailwind utility classes, responsive breakpoints, compressed images, and DOM-level optimizations, reducing mobile load time and enhancing the platform's Core Web Vitals.

Tech stack: Html, CSS, Tailwind CSS, JavaScript, React, MongoDB

WishGrid - Visual Wishlist Web Application | [Github](#)

Feb' 2025 – Apr' 2025

- Engineered an interactive, visually rich Wishlist platform using HTML, CSS, JavaScript, and custom UI components, enabling users to convert ideas and personal goals into dynamic visual cards for an engaging frontend experience.
- Responsible for designing and implementing a modern UI system featuring vibrant themes, smooth CSS/JS animations, and fully responsive layouts—significantly enhancing usability and delivering a polished interface aligned with UX best practices.
- An intuitive Wishlist interaction workflow, allowing users to add, view, and organize short-term and long-term goals through a clean card-based layout—leveraging visual storytelling, structured navigation, and micro-interactions to enhance user engagement.

Tech stack: Html, CSS, Tailwind, JavaScript, PHP

CPU-Scheduling-Simulator | [Github](#)

Feb' 2025 – Mar' 2025

- Developed an interactive frontend interface for the CPU Scheduling Simulator using HTML, CSS, and JavaScript, enabling users to visualize process execution, burst times, and Gantt charts in real time.
- Designed a colorful and modern UI with smooth animations to enhance customer experience and improve usability.
- Designed a clean, responsive UI with intuitive layouts, color-coded process visualization, and animated transitions to enhance clarity and improve the overall learning experience for users.

Tech stack: Html, CSS, Tailwind, JavaScript, Python

SUMMER TRAINING

Placement Ace: Java Bootcamp (LeetCode-Codeforces Edition) [Link](#)

Jun' 2025 – Jul' 2025

- Developed strong understanding of OOP concepts, recursion, arrays, strings, hashing, linked lists, stacks, queues, trees, graphs, and dynamic programming.
- Implemented Java-based solutions following clean code principles, modular programming, and debugging strategies.
- Designed a modular game architecture with separate components for UI, game logic, and state management. [Link](#)

CERTIFICATES

- Complete C Programming- By Udemy [Link](#)
- Python Programming- By Scalar [Link](#)

Feb' 2024 – Mar' 2024

Dec' 2023 – Mar' 2024

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.32**

Punjab, India

Since August 2023

Sophia Girls' Sen. Sec. School

Intermediate; **Percentage: 94%**

Saharanpur, Uttar Pradesh

Apr' 2022 – Mar' 2023

Sophia Girls' Sen. Sec. School

Matriculation; **Percentage: 91%**

Saharanpur, Uttar Pradesh

Apr' 2020 – Mar' 2021
